

HIMANSHU SINGH

GenAI / Agentic AI Engineer | Full-Stack AI Developer

New Delhi, Delhi, India | 8800472236 | hs36861@gmail.com | linkedin.com/in/himanshusingh816

PROFESSIONAL SUMMARY

Full-Stack and AI/GenAI Engineer with hands-on experience building RAG (Retrieval-Augmented Generation) pipelines, multimodal AI applications, and agentic automation for enterprise use cases. Currently a Senior Associate at Grant Thornton Bharat, delivering full-stack solutions (Node.js, Express, Azure Functions), Generative AI-driven automation, and enterprise process automation using Python, RPA, and Microsoft Graph API. Independently built a full-stack GenAI RAG application (Next.js, Flask, Qdrant vector search, LLM/multimodal integration) with a grounded retrieval pipeline, streaming UI, and production deployment via Docker and CI/CD. Skilled in designing serverless architectures on Azure, integrating AI services such as Azure Document Intelligence, and building automation pipelines that reduce manual effort across financial reconciliation and document workflows. Strong foundation in JavaScript, TypeScript, Python, FastAPI, and databases (MySQL, PostgreSQL, MongoDB, Qdrant).

CORE SKILLS

AI / GenAI / Agentic AI: RAG (Retrieval-Augmented Generation), LLM Integration, Multimodal AI, Embeddings, Vector Search, Qdrant, Prompt Engineering, Agentic AI & Automation, Azure Document Intelligence, Evaluation & Grounding

Languages & Frameworks: TypeScript, JavaScript, Python, Next.js, React, Node.js, Express.js, FastAPI, Flask, Tailwind CSS

Cloud & DevOps: Azure Functions, Azure Serverless Architecture, Azure DevOps, Docker, Git/GitHub, GitHub Actions, CI/CD, Vercel, Production Deployment, Microsoft Graph API

Automation & Integration: SAP Workflow Automation, Selenium, RPA, Document Processing (PDF/Excel), REST API Design, Frontend ↔ Backend Integration

Security & Access Control: Authentication, RBAC, Route-Based Access Control, Input Validation, Error Handling

Databases: MySQL, PostgreSQL, MongoDB, Qdrant (Vector DB)

PROJECTS

GenAI RAG Application — Document Intelligence & Multimodal Q&A

- Built a full-stack Retrieval-Augmented Generation (RAG) application with a Next.js/React frontend and Flask API backend, enabling grounded, document-based Q&A.
- Designed the end-to-end pipeline: document ingestion → chunking → embeddings → Qdrant vector search → retriever → LLM/multimodal model → grounded response → streaming UI.
- Implemented multimodal AI support to process and reason over both text and non-text document content.
- Used Qdrant for vector storage and similarity search, and applied prompt engineering techniques to improve grounding and reduce hallucination.
- Built streaming responses in the Next.js UI for real-time LLM output, along with authentication, input validation, and error handling.
- Containerized the application with Docker and set up CI/CD using GitHub Actions, with production deployment on Vercel.
- Applied production engineering practices including structured logging, performance optimization, and testing across the API and frontend.

PROFESSIONAL EXPERIENCE

Senior Associate — Full-Stack & Cloud/AI Engineering | Grant Thornton Bharat LLP

May 2025 – Present

Delhi, India

- Contributing to full-stack development, Azure cloud, serverless architecture, enterprise automation, and client-facing AI solution design.

Project Kavach — Full-Stack & Azure

- Developed backend services and REST APIs using Node.js and Express.js.
- Implemented authentication, RBAC, and route-based access control for secure enterprise access.
- Built serverless solutions using Azure Functions and Azure cloud services.
- Integrated Azure Document Intelligence for AI-powered document processing and information extraction.

- Implemented CI/CD pipelines using Azure DevOps to streamline deployment workflows.
- Partnered directly with clients to translate business requirements into scalable technical solutions.

Project Interface — Agentic Automation & Financial Reconciliation

- Built Python-based agentic automation for financial reconciliation and enterprise processes, reducing manual effort.
- Automated SAP workflows and Excel-based reconciliation with built-in data validation.
- Integrated Microsoft Graph API to power Microsoft 365 automation workflows.
- Designed PDF and Excel document-processing pipelines to support GenAI-driven document workflows.
- Implemented Selenium-based web automation for browser-driven enterprise processes.
- Developed scheduled automation jobs for recurring business processes.
- Contributed to Solution Design Documents (SDDs), architecture discussions, and technical solution planning with clients.

Summer Trainee | Grant Thornton Bharat LLP

Nov 2024 – May 2025

Gurugram, Haryana, India

Data Science Intern | Optifyx Technology

Aug 2024 – Sep 2024

Delhi, India

- Collaborated with the data science team to analyze complex datasets and derive actionable business insights.
- Performed data collection, cleaning, and preprocessing, and conducted exploratory data analysis to surface trends and patterns.
- Contributed to developing predictive models and visualized findings using Tableau and Matplotlib for stakeholders.

Full Stack Developer | TBI GEU (Graphic Era University)

Apr 2024 – Jun 2024

Dehradun, India

- Built responsive, accessible front-end interfaces using HTML, CSS, and React/Angular.
- Developed server-side logic and RESTful APIs using Node.js, Express, and SQL/NoSQL databases.
- Practiced Agile development with sprint planning, stand-ups, and retrospectives; used Git/GitHub for version control and code review.

Developer | Freelancer.com

May 2022 – Oct 2022

Delhi, India

- Delivered full-stack software solutions in an Agile environment, collaborating with cross-functional teams to meet client requirements.

EDUCATION

Master of Computer Applications (MCA), Computer Science

Graphic Era Hill University | Jul 2023 – Aug 2025

Bachelor of Computer Applications (BCA), Computer Science

Indira Gandhi National Open University | Jul 2019 – Aug 2022
